Procedure:

Take Phase A in a main beaker and heat up to 75 °C to 80°C.

Take Phase B in another beaker and heat up to 75 °C to 80°C.

Then mix phase B into Phase A under stirring at 700 to 800 RPM for 20 min.

At 45 °C add Phase C and mix well.

Cool down to room temperature and fill in suitable container.
